

WARRANTY FOREVER[®] MAINTENANCE

MAINTENANCE REQUIREMENTS

To maintain coverage, the following services must be performed on an annual basis.

Motorized and towable RVs:

1. Inspect roof and seal roof where necessary.
2. Inspect axles and hub and lube where necessary.
3. Inspect furnace, including clean blower, combustion chamber and control compartment (remove any dust, lint, obstructions as necessary), and test gas line for leaks.
4. Inspect hot water heater, including flush holding tank, manually operate pressure temperature relief valve and clean burner tube (as outlined by the manufacturer) as necessary.

Motorized RVs only:

1. Inspect suspension and lubricate where necessary, including front and rear suspension components, including but not limited to axle bearings, tie rods, control arms and brake camshaft brackets.

You must keep receipts and documentation showing the date, a description of the unit and all services performed. Proof of maintenance must be mailed to the administrator within 30 days of the anniversary date on which you purchased your travel trailer. Please remember, if you don't submit this information, all future claims will be void.

Don't worry, as a courtesy, we will send you a reminder letter and an email 60 days prior to the required maintenance submission being due.
